

PROJECT MANAGEMENT ASSESSMENT AND TRAINING

CLIENT
National Energy Board

LOCATION
Calgary, Alberta

PROBLEM
Provide the NEB staff with a common understanding of PM terminology and industry best practices in PM.

SOLUTION
A customized training program at three different levels – Team Leader, Basic Level 1, and Basic Level 2.

The National Energy Board (NEB or Board) is an independent federal agency established in 1959 by the Parliament of Canada to regulate international and interprovincial aspects of the oil, gas and electric utility industries. The purpose of the NEB is to promote safety, environmental protection and economic efficiency in the Canadian public interest within the mandate set by Parliament in the regulation of pipelines, energy development and trade. These principles guide NEB staff to carry out and interpret the organization's regulatory responsibilities. The NEB is accountable to Parliament through the Minister of Natural Resources Canada.

Procept Associates Ltd. was hired by NEB to provide its staff with a common understanding of good project management practices and gaining knowledge of terminology based on the Project Management Institute approach.

Our approach for this project was:

- Initial interviews and assessment sessions with the Project Coordinator to gain a full understanding of the objectives of the training and individual employee's needs, and to identify issues and opportunities
- Plan each tailored basic project management training session according to the clients objectives and requirements
- Review and approval of the training program before rollout.

We regularly present these training programs at NEB.
